

DURABILITY MEETS PRECISION

EYE BRAND SHOVELS

CATALOGUE 2024

THE ULTIMATE TOOL FOR YOUR AGRICULTURAL NEEDS

INNOVATIONS

HANDLE INNOVATION

Our 'Eye Brand' shovel handles are crafted from textured plastic material, providing elasticity and impact resistance. They are comfortable to hold, ensuring ease of use for extended periods.

The wooden handles use Grade A quality wood for superior strength, painted with a spray/duco system and dried using an oven system for enhanced durability.

HEAD EXCELLENCE

The shovel heads are made from High Carbon steel, ideal for all your agricultural needs. They undergo a heat treatment process, ensuring maximum strength and longevity.

Unlike other shovels on the market that use cold-pressed plates, our shovels are printed through a heating process using advanced Heat Treatment technology.
